Professional phototrphic support
TAKING IT FURTHER

Leofoto has been specializing in the development and production of photographic accessories since the brand was first established over 15 years ago. The founder of Leofoto, who has been in the photographic equipment industry for 15 years, has a real passion for photography and our mission is to provide the best image support systems and always be the first choice for photographers worldwide.

With a global marketing network that spans more than 30 countries and regions plus an extensive product line, Leofoto is the perfect choice for every photographer. We believe in the power of equipment; having great products might make you different but having the right products is key to really stand out from the crowd. We are passionate about photography and are dedicated to design and develop not just high-quality, but also practical and durable photographic equipment.

Innovation is the foundation of our business and our ideas are developed to help you achieve your photographic dreams, solve your photographic problems, and meet your photographic needs. We research new, cutting-edge technologies and we are not afraid to use them in our product design. That is why we produce only the best quality products that give the user a first-class experience. Every Leofoto product is developed from a photographer's point of view and that is why our products are unique, practical, durable, and easy to use.

To uphold our reputation for products that are functional and diverse, we need to be confident that our products are reliable and durable when used in extreme field conditions. We therefore ensure that every Leofoto product goes through a rigorous testing process to maintain our performance standards.

Bold declaration

In this survival of the fittest times, only the products are blended in innovate and connotation that could be handed down pass through space-time and continue the romaunt of winner.

Mr. Q

A Brand New Tripod
HAS ARRIVED!

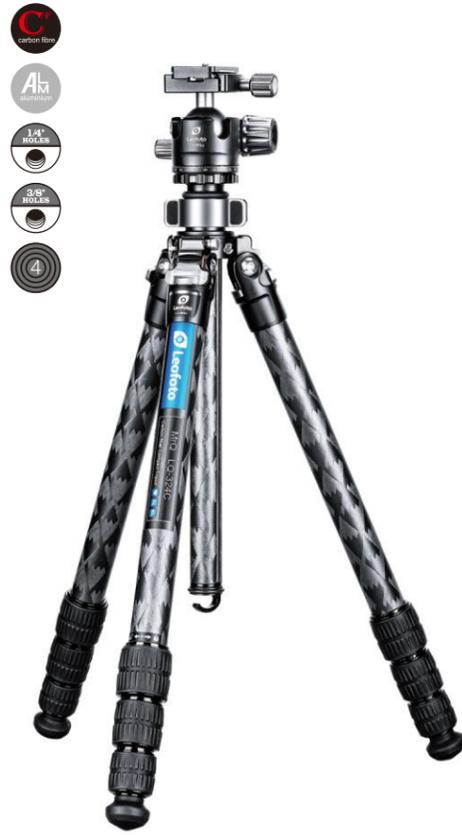

Encompassing our most advanced technology with a new radical design, is an excellent all rounder! Makes you re-think what else can a Tripod do...

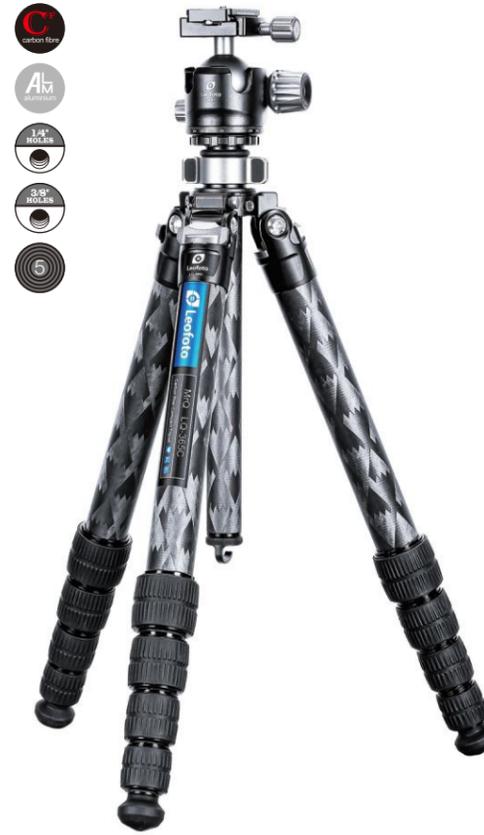

LQ-284C+LH-36
4-SECTION CARBON FIBER TRIPOD KIT

75.98in	7.48in	23.23in	5.03lb	44.09lb	1.42in

Custom accessories for Mr.Q

Regardless of the terrain, each leveling base offers +/-20° of leveling capability and locks solidly with just a twist. When the terrain is tough, choose a leveling base with the flat platform for direct mounting of tripod head.

LBQ-50S
CUSTOM ACCESSORIES FOR MR.Q

55mm	55mm	34mm	±20°	0.19kg	10kg
2.17in	2.17in	1.33in	±20°	0.42lb	22.05lb

3 seconds is all it takes to install/remove the center column

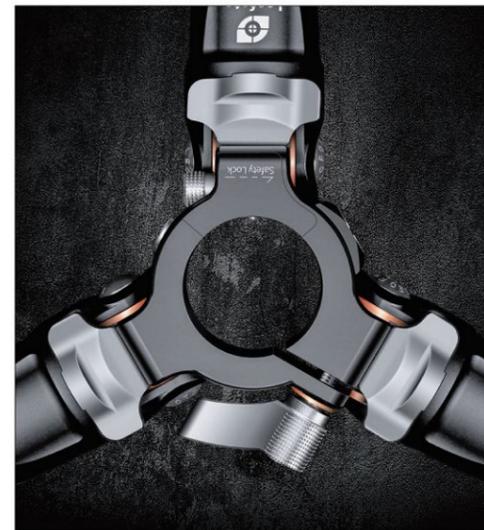

Travel Tripod demands compactness and lightweight, however, in space constraint situations, Mr.Q certainly shows much through research and design. Every thoughtful feature enhances the user experience.

No tools required!

Design-Dare to Think, Dare to Act

Mr.Q's Apex platform, takes a radical approach by abandoning the traditional "O" shape into a brand new "Q" shape. A creatively bold open platform allows easy deployment of all accessories.

LBQ-60S
CUSTOM ACCESSORIES FOR MR.Q

60mm	61mm	37mm	±20°	0.24kg	15kg
2.36in	2.40in	1.46in	±20°	0.53lb	33.07lb

Mr.Y

Y shaped center column tripod

Stability and fine control, a comfortable upgraded shooting experience

Different from the traditional O shaped center column, the Y shaped center column allows the tripod legs to be closer together when folded, reducing the packed diameter of the tripod without sacrificing its stability and functions. Featured 61" max height and 21" folded length, Mr. Y can be packed in the suitcase easily.

The Y shaped center column allows the tripod legs to be closer together when folded.

LY-284C+LH-30 4-SECTION CARBON FIBER TRIPOD KIT

1550mm 61.02in	160mm 6.30in	540mm 21.26in	1.68kg 3.70lb	10kg 22.05lb	28mm 1.10in

Quick detach center column system

Easy change between long column and short column. The lower section of the center column can be detached easily by turning the hook in order to lower the tripod to ground level. The seamless connection between the 2 sections makes the center column smooth and stable

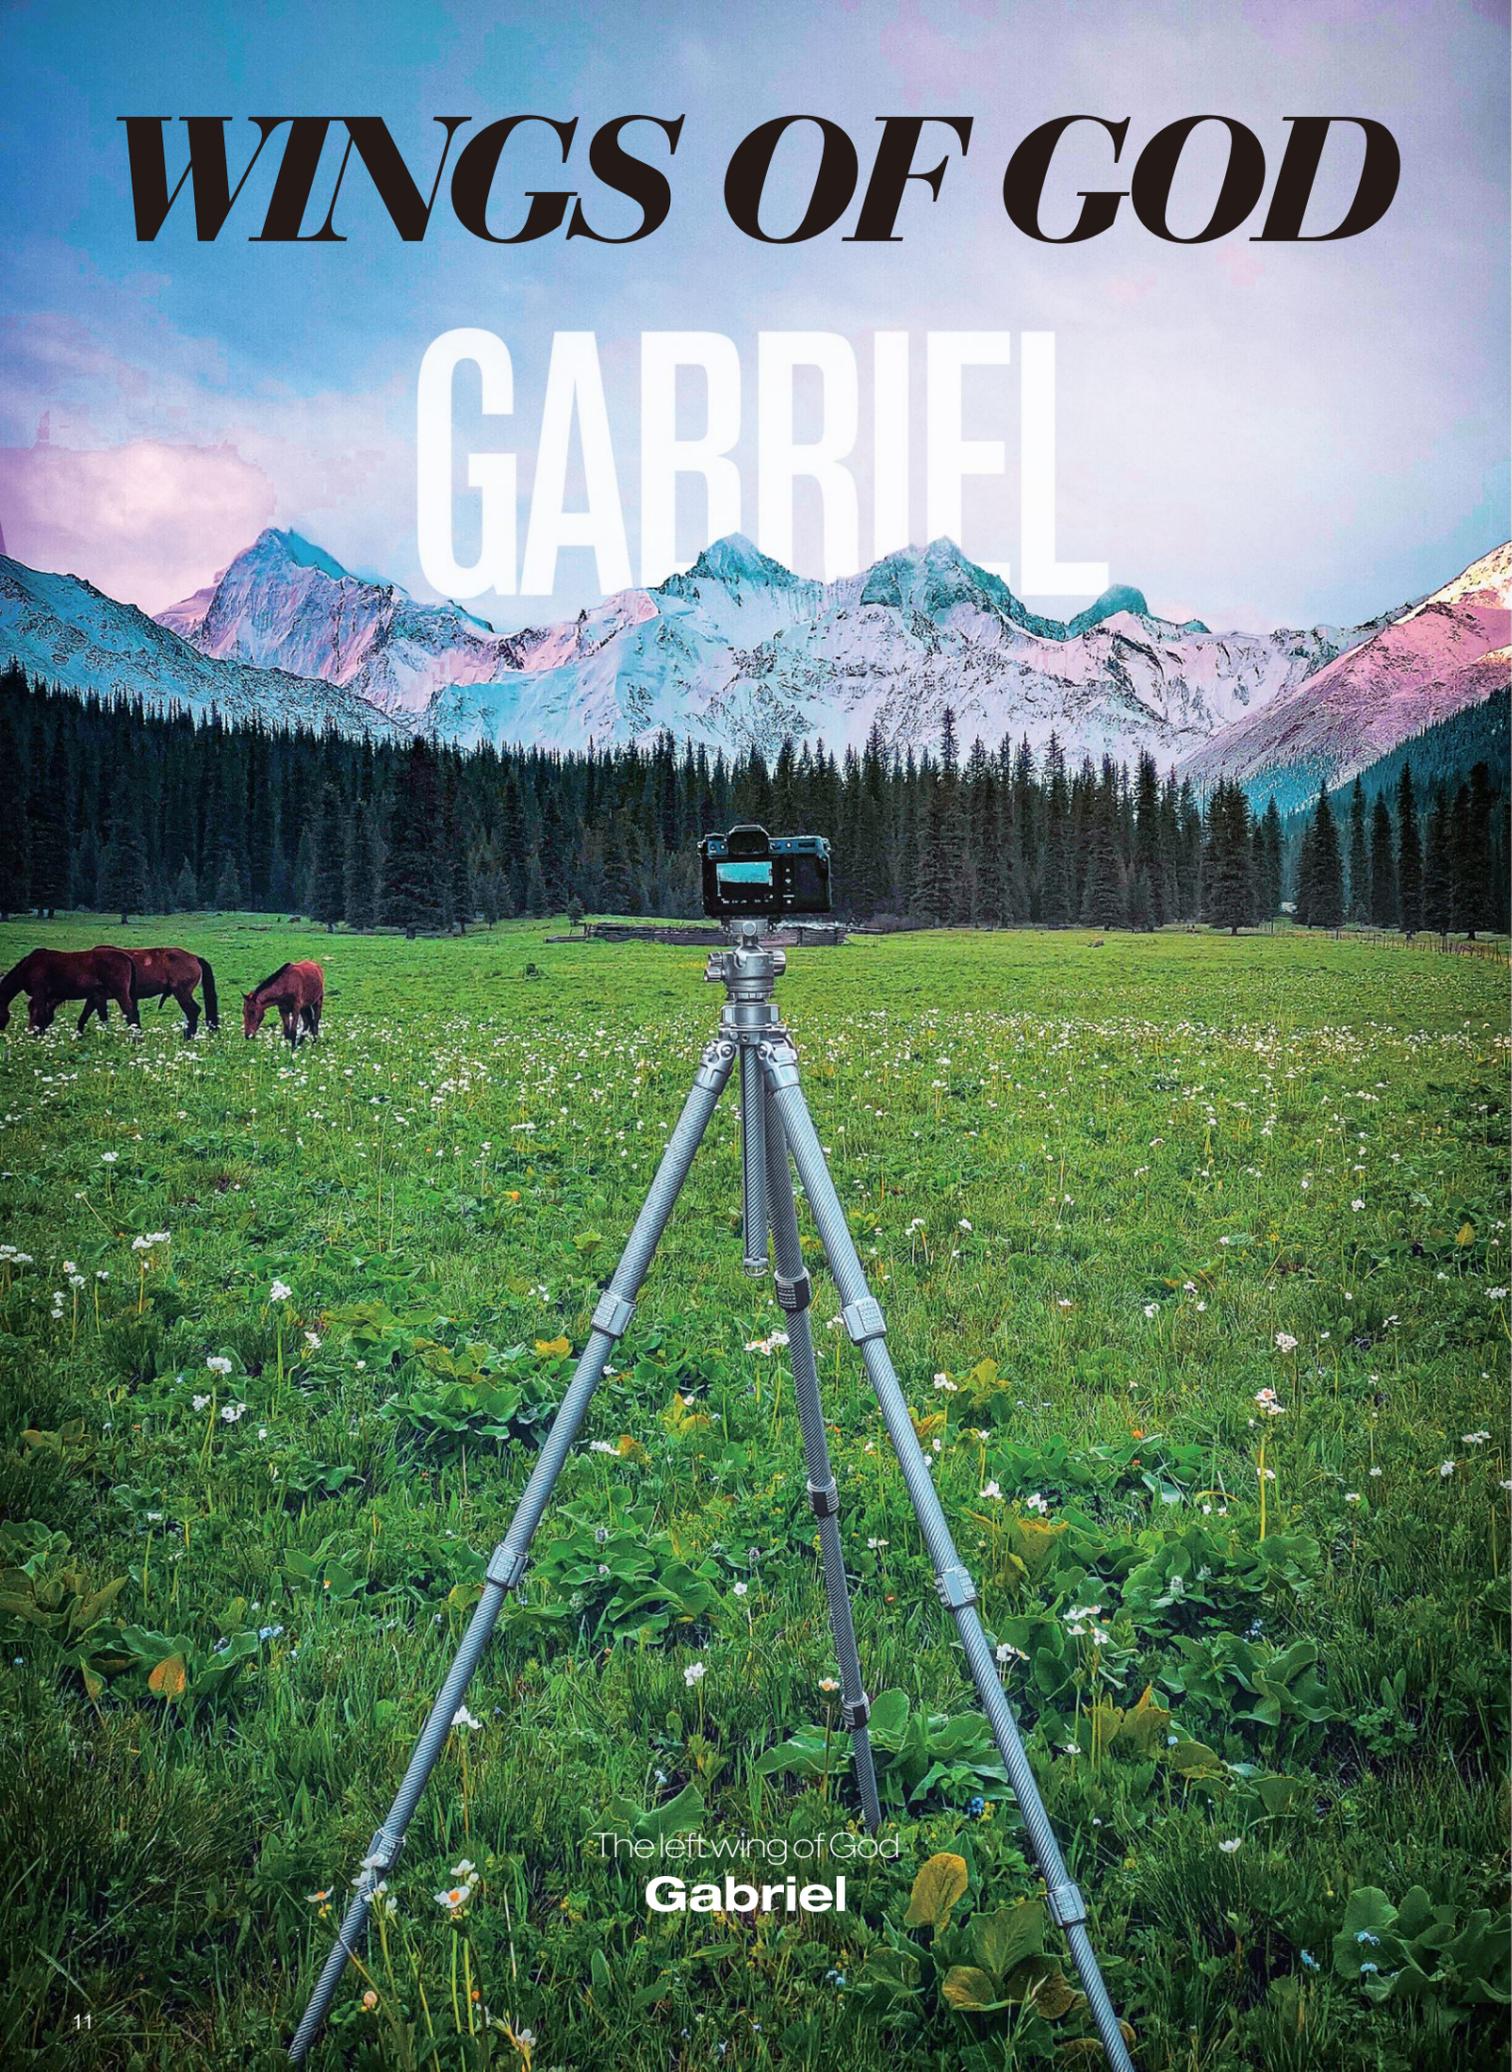

Integrated QD socket on tripod spider

The integrated QD socket on the spider allows you to carry your tripod easily and securely

WINGS OF GOD

GABRIEL

The left wing of God
Gabriel

Gabriel

Lucifer

Designed with Mr.Q's spider and Poseidon's locking system, Gabriel and Lucifer own all Mr.Q's functions and sand-proof and water-proof features. They are the perfect choices for the customers who pursue functions and product appearance.

Lucifer

With a cool and handsome all black body, Lucifer looks low-profile, introverted while strong.

Gabriel

With an elegant all white body, Gabriel looks chic, distinctive, easy-going and sporty.

STUNNING AND UNIQUE

Different from traditional black tripod, Athena series features stunning classic red tubes. Athena, also called Pallas Athena, she is the Godness of wisdom and war in ancient Greek myth and also one of the Twelve Olympians.

Stunning and Unique
Different from traditional black tripod, Athena series features stunning classic red tubes.

WATER&SAND-PROOF

The water&sand-proof feature is equivalent to "maintenance-free system", which saves a lot of cleaning and maintenance time for photographers and improves their recording efficiency. At the same time, it can effectively avoid missing the best shooting time when the tripod cannot be used normally due to the intrusion of sand and water.

CORROSION RESISTANT

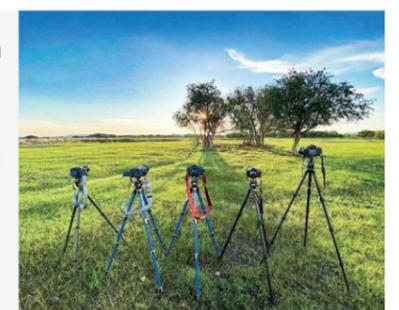

Sea water corrosion is regarded as a "metal eating tiger". Most of the foot spikes and rubber feet screws on the market are made of stainless steel or aluminum alloy. When capturing seascapes, these parts are typically submerged into the seawater which are susceptible to corrosion. Titanium alloy, which has the reputation of "underwater metal", is the Nemesis of sea water corrosion. POSEIDON SERIES tripods' foot spikes' rubber feet screws and tube plugs are all made of titanium alloy for sea water corrosion resistant.

Titanium

Nemesis of sea water corrosion

Waterproof locking system

Mr.O Tripod with built-in ball

Stability and fine control, a comfortable upgraded shooting experience

Mr. O's spider is with a built-in hollow ball, which completely abandon the limitation of up-and-down straight center column and it can move and adjust the angle as freely as a ballhead. Mr.O series is a professional and powerful tripod which can support long lens and heavy cameras. With its low weight and versatile stability, Mr.O will become the new standard for outdoor tripods.

Integrated ball in spider

The integrated ball in the spider can move as freely as a ball head for angle adjustments.

Ground Setting

Pull out the bottom hook, then remove the center column by loosening the twist locks. Set the angles of tripod to the maximum stops, install extra-short center column, mounting platform and 3/8" & 1/4" mounting studs one by one. Finally, tighten the twist locks and the ground setting is now complete.

Central control locking system

Four-axis high-speed precision sculpting craftsmanship and 1mm spacing rectangular display processing central control locking system feature good hand feeling. Bold "Q shape" opening design Faster locking system which takes only half a turn.

3/8" mounting socket

Mounting socket on the apex of the tripod are perfect for magic arm or smart phone clamp.

1/4" mounting socket

Easy link to AM-1&AM-2 magic arms for mounting cell phones and cameras.

Removable and reversible center column

RANGER

A photographic
journey
of creation

No-Column Compact Design

Surprisingly strong, these lightweight tripods easily fit into the average day pack. Weighing in at only one or two pounds, their compact size and ease of operation makes them ideally suited for travellers and those on the go. If you are looking for something light with a surprisingly good load capacity, the Ranger deserves serious consideration.

RANGER SERIES NO-COLUMN COMPACT DESIGN

Leofoto 100% 10-layer carbon fiber tubes have a large outer diameter combined with a super-thin viscosity. This design has led to unprecedented strength-to-weight durability ratios. Rigidity and vibration reduction are further enhanced by the unique cross-patterning of each tubes' fibering structure.

Larger Spider Cavity

The spider cavity of the Summit series is designed to be as large as possible without compromising on strength.

SUMMIT LM

Tripods for heavy cameras and lenses

Summit Series tripods are designed to handle extremely heavy loads and are equipped with a modular operating platform. Their top element, capable of opening and closing, can be adjusted to support flat disc sliding central columns, video half-ball adaptors, leveling bases and an extensive number of other accessories. Ergonomically designed for quick setup, durability and ease of operation, some models can accommodate loads of more than 100lbs! For those that need a tripod that will remain stable under the most demanding conditions, this tripod more than fits the bill.

Leofoto's strongest and most stable series of modular carbon tripods.

Offset Leg Joints: Tripods must occasionally withstand significant torsion loads so it is crucial that the leg angle stops, and all other structural joints are well supported. Our patented offset leg joints fully support the leg angle stops, allowing loads to be transferred straight through the strongest elements of the tripod. This also means the tripod is more compact when collapsed.

Rubber Ball Feet:

Large diameter teardrop-shape keeps leg sidewalls from touching the ground even at the lowest settings and makes positive contact with the ground at virtually any angle. High visibility bull eye spirit level is embedded in the apex for accurate leveling.

Twist Grip Leg Extension Locks: Textured semi-hard rubber allows for easy adjustments and strong grip. Anti-twist leg sections mean each twist lock can be operated independently.

Colorful mini carbon fiber tripod

MT-02C is especially dedicated to professional photographers and promising amateurs who use mirrorless cameras or DSLR cameras with small lenses. Thanks to its compact size and carbon fiber tubes, it weighs only 108g and can be put in the pocket or photographic bag without taking up space. Available in 5 beautiful colors, black, camouflage, olive, blue and wooden, MT-02C enriches the line-up of Leofoto's mini tripods. Featured precision knurling, the patent-pending semi-automatic angle control ring enables the operation of the tripod smooth and comfortable.

Take your MPQ with you and be creative!

OUR CARBON FIBRE MONOPODS ARE A SINE QUA NON FOR THE AVID WILDLIFE PHOTOGRAPHER.

Those working in the field with longer lenses will appreciate the versatility and sturdy build construction.

Monopods

Leofoto released several MPQ series tripods in 2021. Featured snow-capped mountain pattern tubing, fashioned colorful tubes and water-proof leg locks, MPQ series monopods are more functional. For bigger load capacity, users can choose the monopods with larger leg tube diameters. The new monopod head MPG-01 adds the flexibility of the monopods.

A GEARED HEADS

GEARED HEAD

TAKING IT FURTHER 20.05.09

PROFESSIONAL PHOTOTRAPHIC SUPPORT ELEMENTARY BEGINS 10

**G4 GEARED HEAD
WITH NP-60 QUICK RELEASE PLATE**

108mm 4.25in	60mm 2.36in	3/8" 3/8"	690g 1.52lb	20kg 44.09lb

The pivot points of the X and Y

The innovative design of leofoto G4 head makes the pivot points of x-axis and y-axis completely coincide. The result of this new concept is the same and minimum rotation radius. Small movements are possible, so there are few scale deviations, although so far, these deviations have helped to reduce the depth of field in digital photography and often require arduous correction.

**G4+ GEARED HEAD
WITH NP-60 QUICK RELEASE PLATE**

130mm 5.12in	60mm 2.36in	3/8" 3/8"	820g 1.80lb	20kg 44.09lb

3 directions controlled separately

Pitch (perspective control), Roll (leveling) and Yaw (panning) can be achieved via the use of geared design in these 3 directions, allow independent control as well as precise movement to achieve pinpoint composition often required by architectural and product macro photographers. By releasing the pitch/roll quick release lever, one can have quick adjustments in the respective pitch/roll axis, then lock it, and use the large knobs for final precise adjustments.

**G2 GEARED HEAD
WITH NP-60 QUICK RELEASE PLATE**

62mm 2.44in	60mm 2.36in	3/8" 3/8"	370g 0.82lb	20kg 44.09lb

±10° Dual-axis adjustment+panorama

The horizontal, tilt and vertical axes are controlled separately. These mechanisms are located below the camera and allow you to search for the best level before taking pictures. Some photographers use them as inseparable micron motion patella to appreciate their compactness and the extreme accuracy of micron motion, especially in architecture and studios. It also features an arca swiss compatible base, allowing it to be fitted on any existing arca swiss ball head.

**LH-40GR GEARED HEAD
WITH NP-60 QUICK RELEASE PLATE**

128mm 5.04in	57mm 2.24in	40mm 1.57in	3/8" 3/8"	740g 1.63lb	20kg 44.09lb

Combination of ball head and geared head

Ergonomic large main locking knob gives easy handling. Low height profile gives better reliability. Precisely machined ball makes the movement silky smooth. Dual drop-notches allow you easy change from landscape mode to portrait mode or other angle shots. Drag tension knob is with number for better control of the tension. Laser-engraved scale on the panning base for easy and precise control during panorama shooting. It also features the combined advantages of having the strength and quick adjustments of LH-40 ball head and the precise and micro adjustments of a G2 geared head.

**FW-01R 4-WAY HEAD
WITH NP-60 QUICK RELEASE PLATE**

120mm 4.72in	46mm 1.81in	3/8" 3/8"	730g 1.61lb	10kg 22.05lb

**FW-01 3-WAY HEAD
WITH NP-60 QUICK RELEASE PLATE**

120mm 4.72in	46mm 1.81in	3/8" 3/8"	740g 1.63lb	10kg 22.05lb

4 separate knobs for separate controls

Precise framing, compact size and multi-direction control
Separate tilt and pan controls without interfering of each control

4-WAY HEAD

The FW-01 4-way head is compact, precise, and reliable. The aluminum body makes it lightweight, durable, and sturdy. With its innovative foldable knobs design, it allows easy transportation of the head when not in use, making this the most compact 4-way head in the market. The frictional controls on both horizontal and vertical axes allow weight balancing of equipment. The locking knobs can be left open until all adjustments are done. Laser engraved angular scales and 3 leveling bubbles allow repeatable and precise adjustments and reduced postproduction work.

BALL HEAD FAMILY

Dual drop-notches and low profile ball heads

Ergonomic large main locking knob gives easy handling. Low height profile gives better stability. Precisely machined ball makes the movement silky smooth. Dual drop-notches allow you easily change from landscape mode to portrait mode or other angle shots. Drag tension knob is with number for better control of the tension. Laser-engraved scale on the panning base for easy and precise control during panorama shooting.

Leofoto designs and manufactures professional grade ball heads that support heavy loads, lock solidly, and move smoothly. All of our ball heads are faster to use and inherently more stable than 3-axis pan-tilt tripod heads. Tripods with ball heads are also much easier to carry and pack than tripods with pan-tilt heads with long handles. A Leofoto ball head is the best choice for all general photography, and will help you learn to love your tripod. Aiming and horizon leveling can be accomplished as one instinctive motion and rigid lock-up takes just a quick twist of one control. We offer four sizes of all heads: full-sized, mid-sized, compact, and ultra-light. We also offer a variety of different clamp styles to meet the different needs of all shooters.

We believe that your investment should be rewarded with years of satisfaction. The LH series offers up to 45 degrees of tilt in all directions, and up to 90-degrees in the two drop notches. The knurled main lock knob independently controls the tension of the main ball joint. The midsize knurled knob features independent control of the panning base, which has laser-engraved degree markers every 2.5 degrees. The smaller spade knob always works in union with the main lock knob to set a minimum amount of resistance on the ball joint, independent of the main lock knob being fully loosened or not.

Various QR Clamp Options

Screw-knob, lever-release and panning are available for each head.

Screw-Knob Clamps

Lever-Release Clamps

Panning Clamps

SINGE NOTCH BALL HEADS

Leofoto's single notch ball heads include NB, XB and HB series.

NB Series ball heads come with panoramic clamps and the friction knob which is with clicking is designed to be sit in the main lock for compact size. Available in three sizes (compact, medium and large), they're included in our Armor Series tripod kits.

XB Series ball heads come with panoramic clamps and the friction knob is designed to be sit in the main lock for compact size. Available in three sizes (compact, medium and large), they're included in our Urban Series tripod kits.

HB Series ball heads are CNC precision machined from high-grade aluminum alloy and ergonomic giant main lock for easy operation. The super big ball features silky smoothness and super load capacity and great stability, which is perfect for supporting heavy gears.

Best in Class Weight Ratio, 2.20 lbs

PG-1 Gimbal Head was created to provide the ultimate marriage between size, weight and functionality. The PG-1 is able to support any lens, yet is portable enough to be backpacked through the jungle at just 2.20 lbs! The truss design manufactured out of rigid T6061 Aluminum required the LEOFOTO team of engineers to program the CNC machines to their limits. The Gimbal features an independent Pan and knob large enough to be handled with gloved hands. An Arca Compatible cradle clamp nestles your camera plate or long lens mount with precision and security. The fluid type movements will allow you to quickly control your camera and lens combo as if it were an extension of your body. The bottom of the PG-1 is a standard 3/8-16 threaded tripod adapter.

Leofoto's 2-way heads are compact, smooth and can tilt 180 degrees even with large telephoto lenses. Whether you want to capture a bird in a tree or on the ground, the head manages the situations effortlessly. The large tilt-lock knob/long handle is easy to grip and operate, even when wearing gloves. Its internal mechanism will auto-align as you tighten to ensure a perfect alignment with the main tilt axis of the head below. In addition to the standard 3/8" threaded socket, there's also a panning base for panoramic photography.

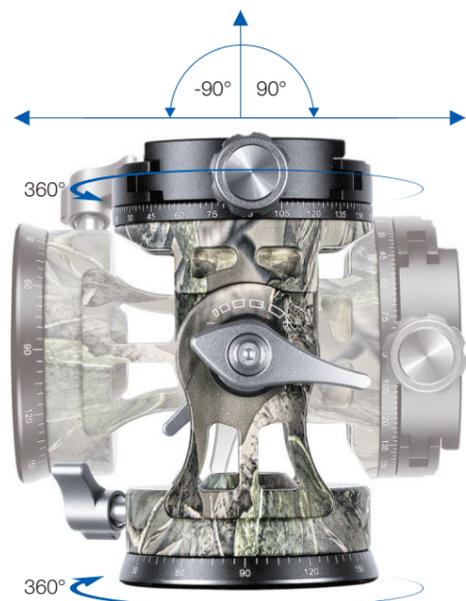

VH-20 2-WAY HEAD

MINI HEADS

Leofoto mini ball heads are versatile and lightweight, designed for shooting with mobile phones, and strong enough for DSLRS.

MBC-20 MINI HEAD WITH NP-30 QUICK RELEASE PLATE

53mm 2.09in	16mm 0.63in	1/4" 1/4"	100g 0.22lb	8kg 17.64lb

Panning Micro Ball Head.

The MBC-20 is a versatile and lightweight platform that is perfect for shooting panoramas with mobile phones and strong enough for DSLRS.

LEVELING BASES

A leveling base on a tripod is the perfect foundation for gimbal heads, fluid heads and even ball heads. It is also a great match with small/medium size cameras, with the ease of quick leveling without having to adjust the tripod legs angle/length. Leofoto's leveling bases are all CNC cutting-machined from lightweight aircraft-grade aluminum and anodized surface finish for better abrasion and corrosion resistance. Available in 3 sizes including 60mm, 65mm and 75mm, these leveling bases can fit most of the tripods on the market.

LB-75S LEVELING BASE

81mm 3.19in	75mm 2.95in	±15° ±15°	3/8" 3/8"	350g 0.77lb	25kg 55.12lb

Easy and fast leveling of the whole setup.

Regardless of the terrain, each leveling base offers +/-15° of leveling capability and locks solidly with just a twist. When the terrain is tough, choose a leveling base with the flat platform for direct mounting of tripod head.

VIDEO SUPPORTS

As the performance of the camera keeps improving, the size of the camera is becoming smaller and more diverse. Therefore, lightweight and portable support systems with excellent performance and diverse functions are the new needs of modern professional photographers. Leofoto's newly developed professional supports can meet these needs. LVM series with excellent load capacity and LV series with portability are designed to keep up with camera trends and help users adapt to the new trends. As one of the most professional manufacturers in this industry, Leofoto never stops designing innovative supports to meet the photographers' changing needs.

Rubber foot and spikes are designed as a whole and they can be exchangeable by turning the rubber foot. All the flip are full covered with silica gel rubber, which provides better grip and easy operation.

Manba LV Series Video Head Systems

LV Series spider is with a built-in hollow ball, which completely abandons the limitation of up-and-down straight center column and it can move and adjust the angle as freely as a ball head. The ball head is CNC machined from 7075 aluminum alloy, stable and durable.

Central column control lever

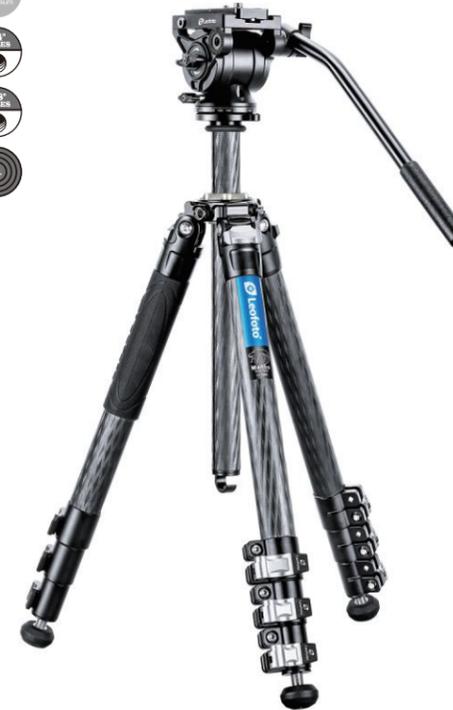

Central column control lever controls the up-and-down and angles by turning half of turn to loosen or lock.

Ground setting

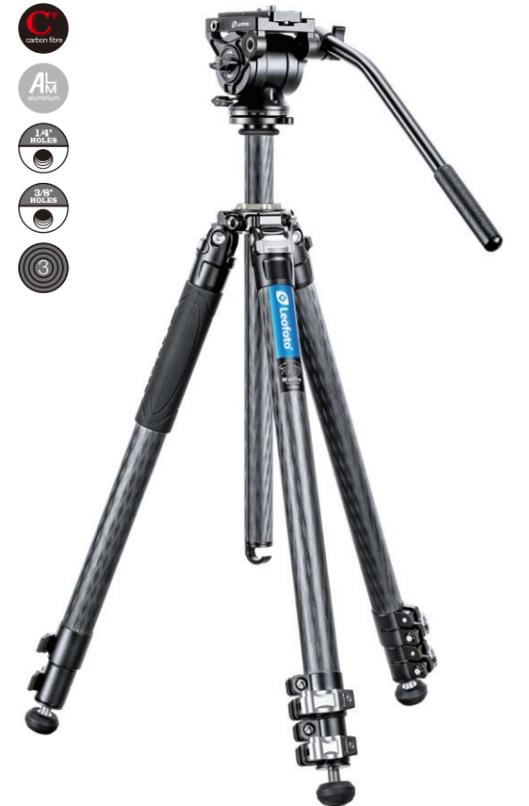

Short center column and platform are included. Remove the long center column and install the short center column for ground setting. There are 3 angles(23°, 55° and 85°) available and 85° is the ground setting angle.

Removable and reversible center column

Spider

LVM's spider designed to integrate the half bowl and spider, so there is no need to install the half bowl when users install the video head.

WAND

MONOPODS+VIDEO

Monopod is a perfect ultra-mobile, high capacity support solution when you are at a concert, stadium etc and it is impossible to use a tripod to support the camera or other setups because of the limitation of the spaces, setups and weight. With the monopod, you can shoot quickly without vibration.

Wand

MV Series Video Head Systems

The new designed MV series monopods feature 10 layers of carbon fiber, light and stable. Each set of monopod is with 2 quick-release systems for fast change between high and low position. The monopod support legs can be folded for compact and easy carry. Combine the monopod with our BV-10 for perfect ultra-mobile, easy and fast support solution.

New quick release system Separate table tripod ballhead kit 3-angle monopod support

The new quick release system is our latest design. There are 2 quick release kits included in every MV monopods. Just simply slide the button and you can remove the monopod and mount the ball head on the monopod support for ground setting.

TRIPOD ARM KIT FOR APPLICATIONS

HX-32/HX-28/HX-25/HX-22
TILTAMI HX SERIES CENTER COLUMN TILT ADAPTER

Tiltami HX series center column tilt adapter is designed for Urban LX series tripods which come with long center column and short center column. It is CNC machined from aluminum alloy and hollow-out designed for lighter weight. With $\pm 90^\circ$ tilting, 360° panning base and toothed lock system, users who own Urban LX Series tripods can use this tilt adapter for more creativities. The tilt adapter is with a 3/8" mounting socket on the bottom and 4 sizes available for 32/28/25/22 leg tube diameters.

HS-32/HS-28/HS-25/HS-22
TILTAMI HS SERIES CENTER COLUMN TILT ADAPTER

Tiltami HS series center column tilt adapter is designed for Ranger LS series tripods. It is CNC machined from aluminum alloy and hollow-out designed for lighter weight. With $\pm 90^\circ$ tilting, 360° panning base and toothed lock system, users who own Ranger LS series tripods can use this tilt adapter for more creativities. The tilt adapter is with a 3/8" mounting socket on the bottom and 4 sizes available for 32/28/25/22 tubes.

HC-32KIT+H-32 **CARBON FIBER HORIZONTAL TRIPOD ARM KIT FOR MULTI-FUNCTIONAL APPLICATIONS**

Model	Height(mm/in)	Tube(mm/in)	Weight(g/lb)
HC-32KIT	610/24.01	32/1.26	1380/3.04

HC-32 KIT is a combo of CNC machined aluminum alloy parts and carbon fiber tube, which is perfect platform for mounting multiple gears such as cameras, telescopes, laptops etc. The horizontal column and vertical column of the kit can be used separately. Vertical column is mounted on horizontal column and adjust the position of the gears by rising and lowering the column. Tilt adapter of the horizontal is with $\pm 90^\circ$ tilting and 360° panning base, which is very flexible. Super anti-twist system including toothed lock, anti-twist groove on the tube and setscrews on the platform secure the gears of users. The bottom is with 3/8" mounting socket, which makes HC-32 KIT can be mounted on almost all the tripods on the market.

HC-32	610/24.01	32/1.26	520/1.15

MC SERIES TRAVEL CLAMPS

Travel clamp is widely used because of its security and stability. With Leofoto's MC travel clamps, now you can mount your camera/cellphone directly to poles, fences, tables, and more.

MC-30 TRAVEL CLAMP
Weight: 72.5g(0.16lb) Max clamp width: 30mm(1.18in)

MC-50 TRAVEL CLAMP
Weight: 167g(0.37lb) Max clamp width: 50mm(1.97in)

MC-100 TRAVEL CLAMP
Weight: 292g(0.64lb) Max clamp width: 123mm(4.84in)

VARIABLE VERSA ARMS

Versa arms add the flexibility and function of the tripod

AM-2T/AM-1/AM-1L/AM-2/AM-2L
These small versa arms can really turn your ideas into reality

AM-3/AM-4 (HIGH-LOCKING STRENGTH)
Extend length: 170mm(6.69in) / 250mm(9.84in)
Weight: 126g(0.28lb) / 166g(0.37lb)

AM-3KIT/AM-4KIT (HIGH-LOCKING STRENGTH)
Extend length: 200mm(7.87in) / 292mm(11.50in)
Weight: 198g(0.44lb) / 239g(0.53lb)

PUMP SUCTION CUP

The pump suction cup is extremely sturdy on any smooth surface and widely used by photographers. The magic arms were designed short to increase the load capacity.

SC-02 KIT / SC-01 KIT
Dual ball, dual notch for free movement

SC-01 PUMP SUCTION CUP
Diameter: 72mm(2.83in) Suggested Load: 1000g(2.20lb)

SC-02 PUMP SUCTION CUP
Diameter: 100mm(3.94in) Suggested Load: 1500g(3.31lb)

UMBRELLA CLAMP

Take good care of yourself and your gears without fear of the sun, the wind, the rain and the snow. Equipped with four 1 / 4 "and 1 3 / 8 " threaded holes, which can be used for external devices such as mobile phones and flash lights.

UC-01 UMBRELLA CLAMP FOR TRIPOD
Weight: 220g(0.49lb) Height: 160mm(6.30in)

UC-02 UMBRELLA CLAMP FOR TRIPOD
Weight: 62g(0.14lb) Height: 65mm(2.56in)

UC-04 UMBRELLA CLAMP FOR L-PLATES
Weight: 103g(0.22lb) Height: 80mm(3.15in)

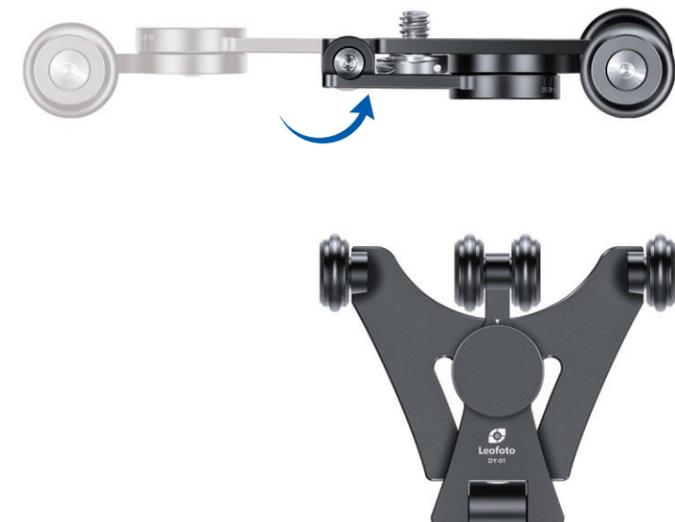

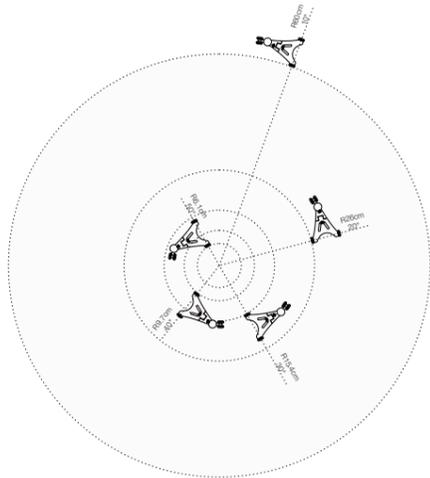

LEOFOTO DY-01 FOLDABLE SKATER DOLLY

Mounted on the video dolly, the camera can pan 360° around the subject without rails. DY-01 was designed to be compact and as light as only 64g while stable. The foldable body design makes DY-01 small and easy to put into the pocket or backpack.

Foldable body design

The rear wheels of the dolly are fixed. The round plate is with a clear scale of $\pm 50^\circ$, and every 10° is a gear position. The dolly can move straight freely or be on a maximum of 50° left or right for directional movement, which makes video shooting more vivid. Cameras, ball heads, phone clamps etc can be mounted on the dolly via the 1/4" screw in the middle. All the wheels are wrapped with rubber to avoid noise and move smoothly.

Product parameters:

- * Weight: 64g(0.14lb)
- * Length: 128mm(5.04in)
- * Aluminum alloy, light and steady
- * Adjust the center of gravity by moving the 1/4 screw
- * Foldable body and easy to carry
- * Rubber wheels for smooth movements and decreasing noise

Circular movement diameter:

- * 10° - 600mm(23.62in)
- * 20° - 260mm(10.24in)
- * 30° - 154mm(6.06in)
- * 40° - 97mm(3.82in)
- * 50° - 61mm(2.40in)

CELLPHONE CAGE KIT

The development of cellphone technology is profoundly changing photography. More and more photography enthusiasts start to use cellphones for creation and recording of life and even famous directors try to use cellphones for film making. For more rigorous creation, it is not enough to rely on the cellphone itself. With the help of cellphone cage kit, users can have more stable pictures, more pure radio, light supplement in a dark environment and camera lens adapter, which will improve the shooting quality.

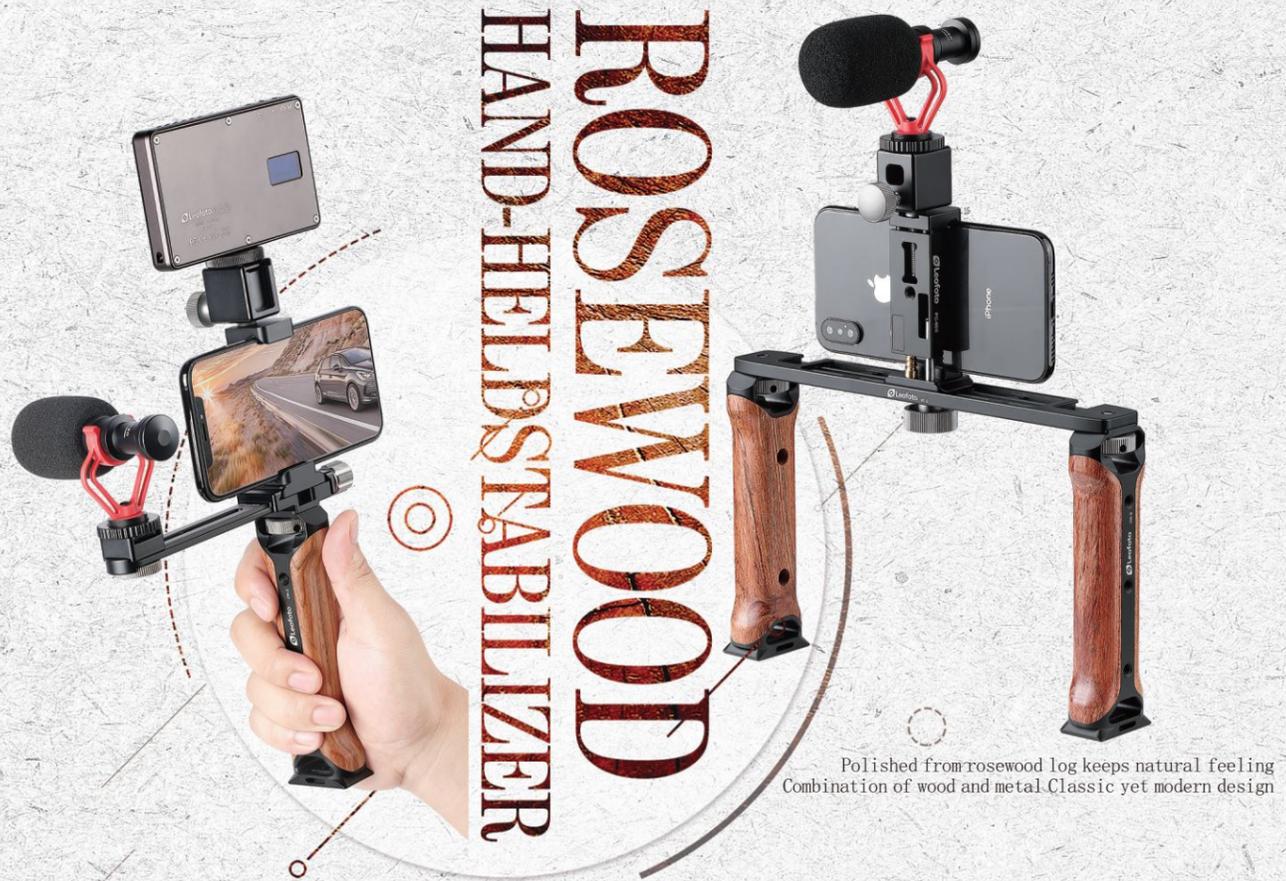

Foldable body design

Leofoto's new PH-01 cellphone cage is a good option for cellphone photography users. It is made of aluminum alloy parts and solid wood handles and weighs only 300g yet very powerful. It. The phone clip is 55mm wide and compatible with 60-95mm width cellphones. With anti-slip pads inside, there is no worries on the cellphone protection and falling down. Featured Arca dovetails, 1/4 and 3/8" mounting sockets, PH-1 can be mounted directly on ball head/tripods/ light stands. The handle distance can be adjusted from 125mm to 245mm by sliding the rails.

Product parameters:

- Weight: 300g
- Height: 90mm
- Maximum width: 240mm
- Applicable mobile phone width: 60 - 95mm
- Hidden wrench tools: Yes
- Cold shoe seat * 2
- Dovetail groove * 2
- 3/8" screw hole * 2
- 1/4" screw hole * 18

ROSEWOOD HAND-HELDS STABILIZER

Polished from rosewood log keeps natural feeling
Combination of wood and metal Classic yet modern design

CAMERA CAGE KIT

The camera cage is with a lot of threaded holes for easy link to hand grip, cellphones, flashes, microphones and other accessories.

CUSTOM CAGE FOR X-T4

PHONE STAND

PC-20 MOBILE PHONE STAND PACKAGE

PC-20 mini cellphone clamp is Leofoto's smallest phone clamp. With 15mm width and 19g weight, the phone clamp is as small as a piece of chalk when it is folded and it is compatible with cellphones with 60-95mm width. With the included key ring, the phone clamp can be attached to the keys and also other gears via the 1/4" mounting sockets on the top. There are 5 colors available.

PS-2 MOBILE PHONE STAND PACKAGE

PS-2 is a multi-functional foldable cellphone stand which weighs 145g and fits 58-93mm wide cellphones. There are 3 ways of mounting the stand including standing on table directly with the open legs, mounting on the ball heads via the Arca standard dovetail and mounting on the light stand or magic arm via the 1/4" mounting socket.

PS-1 MOBILE PHONE STAND PACKAGE

The Leofoto phone clamp is designed specifically for mobile phone photographers. The clamp can be adjusted to accommodate most phones with widths from as small as 2.2" (56mm) up to 3.54" (90mm). The inward-angled jaws are lined with rubber to maintain a firm grip and protect the phone from scratches. There are two 1/4" mounting sockets, conveniently positioned for use with our pocket stand, tripods or other mounting needs.

PC-60 MOBILE PHONE STAND PACKAGE

PC-60 is a mini multi-functional foldable cellphone clamp which weighs only 50g and fits 60-85mm wide cellphones. There are 2 colors available. PS-60 is with powerful functions: 1. The ring can prevent the cellphones from accidental dropping; 2. The ring can support the clamp stand on the table so it can be used as a cellphone stand; 3. The clamp can be mounted on the ball head via the dovetail on the ring; 4. The clamp can be mounted on the light stand or magic arm via the 1/4" mounting socket.

TABLET STAND

PC-190/PC-230 TABLET CLAMPS

PC-190 fits tablets which are 115-190mm wide. PC-230 fits tablets which are 138-230mm. The width of clamp is adjusted and locked by the lock knob, which is precise and secure. Like the Leofoto phone clamps, the jaws that hold the tablet together are lined with rubber to improve grip and prevent scratches.

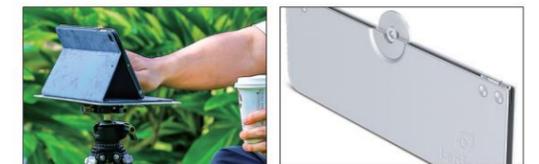

IPC-300/IPC-500 TABLET CLAMPS

IPC-300 is for tablets which are smaller than 12.9". IPC-500 is for tablets which are bigger than 12.9". The tablet clamp can be mounted on tripods/magic arms/ ball heads via 1/4" and 3/8" mounting sockets and Arca standard dovetail on the lock knob on the back of the clamp.

LCH-2 LAPTOP TRAY

LCH-2 is designed for photographers who use the laptops to do post processing when shooting outdoors. The tray is 8.9" and fits almost all the laptops with different sizes. Flanges on the 4 sides of the tray are for stopping the laptop from accidental dropping. The tray can be mounted on ball heads/tripods via the 1/4" and 3/8" mounting sockets and Arca standard dovetail. With the 360° panning base on the bottom, the tray can pan 360° smoothly.

LCH-1 LAPTOP TRAY

LCH-1 mini foldable laptop tray is simple and light. Weights only 245g and 11.8" wide, the mini tray fits laptops which are smaller than 11.8". The foldable body is compact and can be put into the pocket directly. The laptop is with 1/4" mounting socket and can be installed easily.

QUICK-RELEASE CLAMPS

Leofoto has various quick release clamps which are compatible with Arca-Swiss mounting plates to fit the different ball head sizes or different photographic needs. Please contact us if you have a specific need that is not displayed on this brochure.

STEREO PACKAGE

Our camera bars extend the utility of our multi-purpose rails. These long rails have beefy cross sections and dual dovetails for applications that demand zero deflection under maximum torque. Use when you need to work with two cameras mounted side-by-side, or as a macro focusing rail for greater than normal adjustment range.

NP-400 STEREO PACKAGE

Length:400mm/15.75in Width:38mm/1.50in
Weight:252g/0.56lb Dovetail:Arca-Swiss

NP-600KIT STEREO PACKAGE

Length:600mm/23.62in Width:38mm/1.50in
Weight:513g/1.13lb Dovetail:Arca-Swiss

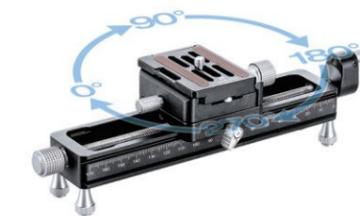

WORM DRIVE MACRO RAILS

MP Series is our premium focusing rails for macro shooting. The bottom is with an Arca-Swiss style dovetail which can be mounted your ball head clamp. MP-180S is equipped with 4 support feet at the bottom and the clamp can pan 360° for panorama shooting.

MP-150/MP-150S MACRO RAIL

Length:208mm/8.19in Width:67mm/2.64in
Weight:340/314g,0.75/0.69lb Dovetail:Arca-Swiss

MP-180S MACRO RAIL

Length:220mm/8.66in Width:54mm/2.13in
Weight:440g/0.97lb Dovetail:Arca-Swiss

UNIVERSAL QUICK RELEASE PLATES

Leofoto universal quick release plates are designed for most of cameras. Each plate is precision-machined from aluminum alloy and hard anodized. All Leofoto quick release plates are with Arca standard dovetail which are compatible with any Arca style clamps in the market.

	PU-25 25*38mm (0.98*1.50in) 10g (0.02lb) Arca-Swiss		NP-30 31*38mm (1.22*1.50in) 12g (0.03lb) Arca-Swiss		NP-50 50*44mm (1.97*1.73in) 38g (0.08lb) Arca-Swiss

SPECIFIC L-PLATES

Our camera plates are Arca-Swiss compatible and have anti-twist flanges for dedicated mating. Each L-plate has been customized to adapt to a specific camera, ensuring that it is secured but doing so in a way that does not impede access to its controls. L-plates have the added advantage of being dovetailed along both the vertical and horizontal axes, which means switching orientation between portrait and landscape is easy.

NODAL SLIDE WITH INTEGRAL CLAMPS

To eliminate the possibility of parallax errors when stitching individual frames into panorama, it is necessary to calibrate your nodal point for the different lenses and focal lengths photographers use. Leofoto nodal rails come with an integrated clamp and built-in bubble level. The double-dovetail design allows for dual clamping surfaces on the rail. Metric scale on rail sides to aid precise positioning.

MULTI-TOOL

Everyday carry tools for photographers

ALLEN WRENCH TOOL

58mm 7g
2.28in 0.02lb

MPL MULTI-TOOL

74mm 30g
2.91in 0.07lb

LMT-10 MULTI-TOOL

125mm 94g
4.92in 0.21lb

Everyday carry tools

These tools are all multi-functional. MPL weighs only 30g and includes 3mm/4mm/5mm allen wrenches, screw driver, beer bottle opener, carabiner and a key ring. LMT-10 includes 10 sizes of tips and weighs 94g. With 3/8" mounting socket on the bottom and 124mm long body, the tool can be used as a extension tube or handheld stabilizer.

QUICK-LINK SET

Fast to attach and detach for better efficiency

QS QUICK-LINK SET

With one base and different quick release plates, you can have fast and easy change in ball head, center column and rail etc. Quick release plate and the base are both with 3 pcs anti-twist set screws, please tighten the screws with the included hex key to stop the gears from twisting.

FA QUICK-LINK SET

From now on, flash is with quick release plate "V" type quick release dovetail for easy operation and security.

OTHER ACCESSORIES

Small accessories play very important role during the shooting.

CF-7/CF-8 EXPANSION ACCESSORIES

30mm 36/29g
1.18in 0.08/0.064lb

Small but powerful

These accessories are tiny and light, but they help the users in different ways. With these small accessories, users can attach the fill lights, microphones, cellphones and other gears to the cameras and improve the shooting quality.

MOBILE MACRO STUDIO

MC-01 CLAMP

For: small strip objects such as flowers and branches
Manganese steel body and part with 1/4" mounting hole

Length: 102mm(4.02in) Weight: 32g(0.071lb)

MC-02 CLAMP

For: reflectors and other thin objects
Manganese steel body and part with 1/4" mounting hole

Length: 92mm(3.62in) Weight: 38g(0.08lb)

MC-03 CLAMP

For: pens, torches etc
Aluminum alloy body, stainless steel part with 1/4" mounting hole

Length: 73mm(2.87in) Weight: 24g(0.05lb)

AM-1XL, AM-1TXL LONG MAGIC ARM

4 locks, flexible and variable
Fix by locking, accurate positioning

Length: 350mm(13.78in) Weight: 187g(0.41lb)

A200+P50/A200+P50B SPIKE

Ground Setting
Trident wing cross section structure

Length: 206mm(8.11in) Weight: 70g(0.15lb)

REPLACEMENT FOOT ACCESSORIES

Users can replace the rubber feet with different spikes and feet according to different surfaces. Rubber feet can protect the smooth floor from scratching. Spikes are CNC machined from stainless steel and bite into the ground or ice. Rock claws have scalloped edges which can bite into rocks and other hard surfaces. Snowshoes can prevent the tripods from sinking into the snowfield or sands.

TFC S1/4, TFC S3/8, TFC STAINLESS STEEL CLAW

Different from other foot spikes, the rock claw has scalloped edges which can bite into hard surfaces such as rocks, ice etc.

Diameter: 28,28,36mm(1.10", 1.10", 1.42") Weight: 25,28,48g(0.06, 0.06, 0.111lb)

TFS S1/4, TFS S3/8, TFS STAINLESS STEEL LONG SPIKE

Machined from solid stainless steel, the TFS foot spike bites into soft surfaces to keep your tripod feet from slipping.

Length: 81,81,113mm(3.19", 3.19", 4.45") Weight: 47,50,108g(0.10, 0.11, 0.241lb)

TFN SPIKE TRIPOD FOOT

Machined from solid stainless steel, the TFN foot spike bites into soft surfaces to keep your tripod feet from slipping.

Length: 68mm(2.68") Weight: 38g(0.08lb)

LF MUSHROOM SHAPED RUBBER FEET

1/4", 3/8" stainless steel screw threads allow replacement of different types of feet.

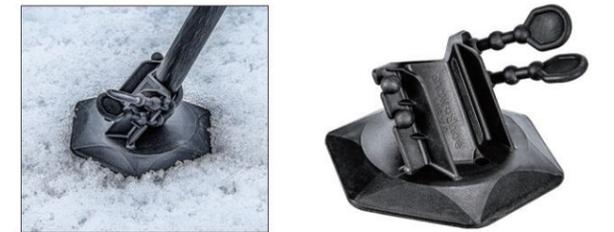

Diameter: 31~44mm(1.22"~1.73") Weight: 34~73g(0.08~0.16lb)

TFW MULTI-FUNCTIONAL REPLACEMENT FEET

Stainless steel foot spikes+snow shoes
Foot spikes+snow shoes, ideal for use in rocky, icy and snow terrain

Diameter: 87mm(3.43") Weight: 70g(0.15lb)

TFW-2 SNOW SHOES FOR SNOW AND SAND

Ideal for use in snow, sand and other soft surfaces
Keeps the tripod stable and safe in snow, sand and other soft surfaces

Diameter: 144mm(5.67") Weight: 95g(0.21lb)

SC-50, SC-80 WIDE FEET

Aluminum alloy and silica gel, aging resistant
Excellent adhesion to all kinds of surface, ensures stability on iced surface

Diameter: 50,80mm(1.97, 3.15") Weight: 90,180g(0.20, 0.40lb)

TITANIUM ALLOY ACCESSORIES

Sea water corrosion is regarded as a "metal eating tiger". Most of the foot spikes and rubber feet screws on the market are made of stainless steel or aluminum alloy. When photographers shoot sea views, these parts are usually immersed in sea water, which will soon be corroded. Titanium alloy is widely used in aerospace products. It has excellent metal properties and is regarded as the most advanced and best material in high-end bicycles manufacturing industries. Titanium alloy features light weight, high strength, good elasticity, good impact endurance, corrosion resistance and rust proof which has the reputation of "underwater metal", is the Nemesis of sea water corrosion.

TF-02 TITANIUM ROCK CLAW

Different from other foot spikes, the rock claw has scalloped edges which can bite into hard surfaces such as rocks, ice etc.

Diameter: 36mm(1.42") Weight: 12g(0.03lb)

TF-01 TITANIUM FOOT SPIKES

Machined from titanium steel, the TF-01 foot spike bites into soft surfaces to keep your tripod feet from slipping.

Length: 46mm(1.81") Weight: 17g(0.04lb)

UL-01T UNIVERSAL TITANIUM L PLATE

Featured 80mm sliding groove, the L plate is compatible with most of the camera bodies in the market

Length: 120mm(4.72") Weight: 88g(0.19lb)

NP-65T TITANIUM QR PLATE

Wide D shaft 1/4" stainless steel screw
Hollow-out for lighter weight

Length: 65mm(2.56") Weight: 32g(0.07lb)

QUICK DETACH STRAP

Automatic lock, lightening fast

The strap swivel and collar are made of stainless steel or aluminum alloy. Press button to install and pull to remove, fast and convenient. It can really help you to add or remove the strap to/from the lens lightning fast.

ALL METAL DESIGN

The strap swivel and collar are made of stainless steel or aluminum alloy. Fine 2.5mm wide nylon webbing material is durable and wear resistant

SP-01 QUICK DETACH STRAP

Featured a MAGPUL compatible push button
It can really help you to add or remove the strap to/from the lens lightning fast.

Length: 1310mm(51.57") Weight: 275g(0.61lb)

STRAP-LS QUICK DETACH STRAP

Including 1/4" screw joint
For all tripods with 3/8" spider

Length: 1310mm(51.57") Weight: 250g(0.55lb)

STRAP-LM QUICK DETACH STRAP

Including 3/8" screw joint
For all Leofoto Summit LM tripods and tripods with 3/8" spider

Length: 1310mm(51.57") Weight: 250g(0.55lb)

STRAP-LN QUICK DETACH STRAP

Including metal fastener
For all Leofoto Mountain LN tripods

Length: 1310mm(51.57") Weight: 250g(0.55lb)

BAGS

The Leofoto Camera Bag offering is more than just a broad range of bags, it is a complete photo carrying solution system designed to enhance the individual style of photographers while meeting their photographic needs. We use only the latest innovative materials to construct the lightest camera bags on the market

Summit series tripod+PG-1 gimbal head case

Only for tripods with less than 36mm tubes

Summit series tripod bag

This lightweight 75cm unpadded tripod bag made to protect your tripod with mounted head. Its asymmetric tapered shape allows you to store the Summit series tripod with the head attached and tripod legs fit comfortably in the narrower end. The main zipper extends down the full length of the bag while wrapping around the top area to easily open and grab your tripod. The thermoform padding for the head protects the tripod head during transport.

Ranger/Urban Series Tripod Bag

This lightweight, padded tripod bag is made to protect your tripod and mounted head. The main zipper extends down the full length of the bag whilst wrapping around of the top area to easily open and grab your tripod. The thermoform padding for the head protects the tripod head during transport.

OTHER BAGS

RB-2 UNIVERSAL TRIPOD ROCK BAG

Bag for adding weight and storage, easy and quickly to pick up
Big load capacity and rip proof

Diameter: 320mm(12.60") Max load: 20Kg(44.09lb)

AC-2 ACCESSORY PACKAGE BAG

AC-2 can be hung on the tripod for easy and efficient pick up of accessories during outdoors shooting

Deployment height: 490mm(19.29") Weight: 268g(0.591lb)

AC-1 ACCESSORY PACKAGE BAG

Length: 310mm(12.20") Weight: 260g(0.571lb)

SPECIFIC BAG FOR MT-03

Length: 250mm(9.84") Weight: 88g(0.191lb)

GIMBAL HEAD BAG

Length: 290mm(11.41") Weight: 250g(0.551lb)

MC SERIES MULTI-CLAMP BAG

Length: 155mm(6.10") Weight: 120g(0.261lb)
